

PETTIT PAINT

MATERIAL SAFETY DATA SHEET

Supplier:	Kop-Coat, Inc. Marine Group 36 Pine Street Rockaway, NJ 07866	EMERGENCIES: Health/spills.....: Chemtrec Assistance.....: Chemtrec Outside USA.....:	800-548-0489 800-424-9300 703-527-3887
		Kop-Coat, Inc. Product Information.....: Outside USA.....:	800-221-4466 973-625-3100

1. Product Information

Product name	Prop Coat Barnacle Barrier 1792 Aerosol
Product code	1179320\1

Issuing date: 11/19/2013

Contact person:

Environmental Health & Safety Mgr

2. Hazards identification

Emergency Overview

Appearance: Liquid

Odor:

Solvent Like

Hazards: DANGER!

Contents under pressure. Extremely flammable liquid and vapor. Vapors may cause flash fire. Harmful if inhaled. Vapor harmful. May affect the brain or nervous system causing dizziness, headache or nausea. Harmful if swallowed.

Potential health effects

Primary Routes of Entry: Eye contact, ingestion, skin contact, inhalation, and absorption.

Eye contact:

Causes eye irritation.

Ingestion:

May be harmful if swallowed. Aspiration of this product into the lungs during ingestion, gagging or vomiting may cause lung damage, which can be fatal.

Skin contact:

May cause skin irritation. Symptoms may include dryness, itching, burning sensation, redness, cracking and swelling depending on the extent of exposure. May be absorbed through skin. Prolonged and/or repeated skin contact may

cause symptoms including dryness, itching, burning sensation, cracking and redness.

Inhalation:

May cause irritation to the nose, throat and respiratory tract. Inhalation of high concentrations of vapors may cause respiratory tract irritation and central nervous system depression. Symptoms may include headache, nausea, dizziness and drowsiness. Continued inhalation may result in unconsciousness or death. Serious risk of suffocation when in confined area.

Chronic effects:

Prolonged or repeated dermal exposure to this product can cause skin dermatitis characterized by red, dry, scaly skin. NOTICE: Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal.

Target Organs:

Not Determined

This product contains carcinogens or potential carcinogens as listed by IARC or NTP. See Section 3 NTP, IARC (Carc.) columns for chemical identification.

3. Composition/information on ingredients

<u>Chemical Name</u>	<u>CAS-No.</u>	<u>Weight %</u>	<u>Carc</u>
Zinc	7440-66-6	30 - 50	
Toluene	108-88-3	20 - 30	
Propane/Isobutane/n-Butane	68476-86-8	10 - 20	
Aliphatic petroleum distillates (mineral spirits)	64742-88-7	1 - 10	
Aliphatic Hydrocarbon (Stoddard type)	8052-41-3	1 - 10	
Ethylbenzene	100-41-4	1 - 10	*
Xylene	1330-20-7	1 - 10	

4. FIRST AID MEASURES

Eye contact:

Immediately flush the contaminated eye(s) with lukewarm, gently flowing water for 15-20 minutes, while holding the eyelid(s) open. If a contact lens is present, DO NOT delay irrigation or attempt to remove the lens. Take care not to rinse contaminated water into the unaffected eye or onto the face. Call poison control center, hospital emergency room, or physician immediately.

Ingestion:

NEVER give anything by mouth if victim is rapidly losing consciousness, or is unconscious or convulsing. Have victim rinse mouth thoroughly with water. DO NOT INDUCE VOMITING. Have victim drink 2 to 8 oz. (60 to 240 mL) of water. If vomiting occurs naturally, have victim lean forward to reduce risk of aspiration. Have victim rinse mouth with water again. Immediately obtain medical advice.

Skin contact:

As quickly as possible, remove contaminated clothing, shoes and leather goods (e.g. watchbands, belts). Quickly and gently blot or brush away excess chemical. Immediately wash with lukewarm, gently flowing water and non-abrasive soap for 15-20 minutes. Immediately obtain medical advice. Completely decontaminate clothing, shoes and leather goods before reuse or discard.

Inhalation:

This product is combustible/flammable. Take proper precautions (e.g. remove any sources of ignition). Remove source of contamination or move victim to fresh air.

Note to Physician :

There is no specific antidote for effects from overexposure to this material. Treatment should be directed at the control of symptoms and the clinical condition.

5. FIRE-FIGHTING MEASURES

Flash point - 156° deg F / - 104°C

Extinguishing media:

Use alcohol foam, dry chemical, carbon dioxide or any Class B fire extinguishing agent. Water may be unsuitable for extinguishing fires. Water may be used to cool and prevent the rupture of containers that are exposed to the heat from a fire.

Hazardous combustion products:

See Section 10 for potential decomposition products.

Protective equipment and precautions for firefighters:

Extremely flammable liquid and vapor! Evacuate area and fight fire from a safe distance. Evacuate all persons from the fire area to a safe location. Move non-burning material, as feasible, to a safe location as soon as possible. Fire fighters should be protected from potential explosion hazards while extinguishing the fire. Wear self-contained breathing apparatus (SCBA) and full fire-fighting protective clothing. Thoroughly decontaminate all protective equipment after use. Containers of this material may build up pressure if exposed to heat (fire). Use water spray to cool fire-exposed containers. Use water spray to disperse vapors if a spill or leak has not ignited. DO NOT extinguish a fire resulting from the flow of flammable liquid until the flow of the liquid is effectively shut off. This precaution will help prevent the accumulation of an explosive vapor-air mixture after the initial fire is extinguished.

6. ACCIDENTAL RELEASE MEASURES

Personal & Environmental Precautions:

Follow personal protective equipment recommendations found in Section 8. Personal protection needs must be evaluated based on information provided on this sheet and the special circumstances created by the spill including; the material spilled, the quantity of the spill, the area in which the spill occurred, and the training and the expertise of employees in the area responding to the spill. Never exceed any occupational exposure limits. Remove sources of ignition immediately. Stop flow of material if safe to do so. Contain spill and keep out of water courses. Ventilate area. Absorb spill in sand, earth or other suitable material. Transfer to appropriate container for disposal using non-sparking tools.

Methods of Containment & Clean-up and Other Information:

This product, if released in large enough quantities, may need to be reported to the US Coast Guard National Response Center at 1-800-424-8802. Contain spills with dikes and absorbents (sand, earth, dry chemical absorbent) to prevent migration and entry into waterways.

7. HANDLING AND STORAGE

Handling:

Avoid contact with eyes, skin or clothing. Avoid inhalation (vapor, mist, dust or fume, as applicable). Use only with adequate ventilation. Observe good personal hygiene practices and recommended procedures. Wash thoroughly after handling. Keep container closed and upright when not in use. To prevent generation of static discharges, use bonding/grounding connection when transferring material. Vapors may accumulate and travel to distant ignition sources and flashback. Extinguish all sources of ignition including pilot lights, non-explosion proof motors and electrical equipment until vapors dissipate. Since empty containers may retain product residue and flammable vapors, observe precautions even after container is emptied. Do not cut, puncture, or weld on or near empty containers. Do not smoke where product is used or stored. Contents under pressure. Do not puncture, incinerate, or discard in a compactor. Do not store above 120°F, or in direct sunlight. Intentional misuse by deliberately concentrating and inhaling vapors may be harmful or fatal. Contents under pressure. Do not puncture, incinerate, or discard in a compactor. Do not store above 120°F, or in direct sunlight. Intentional misuse by deliberately concentrating and inhaling vapors may be harmful or fatal.

Storage:

Keep containers closed when not in use. Store in cool, well ventilated space away from incompatible materials. Store in areas/buildings designed to comply with OSHA 1910.106. Store away from sources of ignition and heat.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Chemical Name	CAS-No.	Z-1 PEL	Z-2 PEL	ACGIH TLV
Zinc	7440-66-6			
Toluene	108-88-3		200 PPM	20 PPM

Prop Coat Barnacle Barrier 1792 Aerosol

Propane/Isobutane/n-Butane	68476-86-8	1800 MGM3 (1000 PPM)	
Aliphatic petroleum distillates (mineral spirits)	64742-88-7		
Aliphatic Hydrocarbon (Stoddard type)	8052-41-3	2900 MGM3 (500 PPM)	100 PPM
Ethylbenzene	100-41-4	435 MGM3 (100 PPM)	100 PPM
Xylene	1330-20-7	435 MGM3 (100 PPM)	100 PPM

Engineering measures:

Use adequate ventilation to maintain airborne concentrations at levels below permissible or recommended occupational exposure limits. Supplementary local exhaust ventilation may be necessary in poorly ventilated spaces, during spraying, heating or other non-routine activities.

Eye/face protection:

Wear chemical-resistant glasses and/or goggles and a face shield when eye and face contact is possible due to splashing or spraying of material.

Skin protection:

Chemical-resistant, flexible-type gloves (Viton(R), neoprene, nitrile or equal) to prevent contact. Gloves should be rinsed and removed immediately after use. Wash hands after removing gloves. Applicators and other handlers working with the concentrate must wear coveralls over long-sleeved shirt and long pants, chemical-resistant apron, footwear and socks.

Respiratory protection:

Respiratory protection may be necessary under certain use conditions. Under such conditions, an appropriate, properly fitted NIOSH-approved respirator must be worn. If respirators are used, a program should be instituted to assure compliance with 29 CFR 1910.34 and 42 CFR 84.

General hygiene considerations:

Facilities utilizing this material should be equipped with an eyewash station and safety shower. Thoroughly clean shoes and wash contaminated clothes before reuse.

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical state	Aerosol
Appearance:	Liquid
Odor	Solvent Like
pH	Not applicable.
Boiling point	not determined
Flash point	- 156° deg F / - 104°C
Solubility in water:	Slight
Specific Gravity:	1.31
Weight per gallon (LB/GAL) :	11
Evaporation rate (n-Butyl acetate = 1):	Faster than Ether
Volatile by Weight (including water and exempt compounds) (%):	60%
Volatile Organic Content (VOC):	610 lb/gal

10. STABILITY AND REACTIVITY

Stability:

Stable under normal conditions.

Incompatibility:

Oxidizing and reducing agents. Oxidizing agents, acids and bases. Keep away from heat, sparks and open flames.

Hazardous decomposition products:

Carbon monoxide, carbon dioxide, oxides of nitrogen and other toxic organic compounds.

11. TOXICOLOGICAL INFORMATION

Toluene (CAS# 108-88-3): Prolonged intentional toluene abuse and overexposure to laboratory animals has been associated with central and peripheral nervous system, liver, kidney, blood, vision, hearing and heart damage. Overexposure to animals has been associated with adverse reproductive and developmental effects.

Xylene: Laboratory animals exposed to high levels of xylene showed evidence of effects on the liver, kidneys, lungs, spleen, and caused hearing loss. Rats exposed during pregnancy to xylene showed fetotoxic effects.

Ethylbenzene: Ethylbenzene is classified by IARC as possibly carcinogenic to humans (2B) based on inadequate evidence in humans and sufficient evidence in laboratory animals. Lifetime inhalation exposure of rats and mice to high ethylbenzene concentrations resulted in increases in certain types of cancer, including kidney tumors in rats and lung and liver tumors in mice.

12. ECOLOGICAL INFORMATION

Ecological evaluation of this material has not been performed; however do not allow the product to be released to the environment without governmental approval/permits.

13. DISPOSAL CONSIDERATIONS

Waste from this material may be a listed and/or characteristic hazardous waste. Dispose of material, contaminated absorbent, container and unused contents in accordance with local, state, and federal regulations.

14. TRANSPORT INFORMATION

Transportation:

This product may be reclassified as Consumer Commodity, ORM-D, when shipped by ground; packaging quantity limitations apply.

By Ground:

DOT Hazard Class: See above.

DOT Proper Shipping Name:

DOT Packing Group:

DOT UN Number:

By Air:

IATA Hazard Class: 2.1

IATA Proper Shipping Name: Aerosols

IATA Packing Group: Not applicable.

IATA UN Number: UN1950

By Sea:

IMDG Hazard Class: 2.1
IMDG Proper Shipping Name: Aerosols
IMDG Packing Group: Not applicable.
IMDG UN Number: UN1950

15. REGULATORY INFORMATION

EPA registration number: Not applicable.

Pest Registration Act number: Not applicable.

Other:

This product is not registered for use or sale in the United States of America.
